

Cala:Our Ideas

We believe that:

The work of building “**Another Possible World**” also has an essential component of **education/training and cultural creation**: a necessary fighting field for the development of other values, other attitudes, both alternative and contrary to the prevailing values of today’s world.

With these ideas, a team of committed and specialised people have carried out a stable, horizontal, respectful and useful support project, partly based on a permanent education/training centre.

This support project has among its possible target population:

- Individuals and groups involved in education, interested in the promotion of alternative assumptions and values
- Alternative social movements and discriminated groups that may need formative support to improve both their working system as groups, and their action in society.
- Local groups, of adults or young people, interested in the advancement towards other ways of more direct participation and involvement, and new ways of being together, of culture and leisure.

This project is necessarily based on **different educational and teaching assumptions**.
