**To All Our Spanish Friends
Comrades in the Workers Federations
Comrades in the Spanish political Progressive
Friends in the Spanish Solidarity Movement**

Workers Greetings to all,

We are writing this letter while the Palestinian people is suffering the most dangerous political and security circumstances. Actually, the worst through over the history of the Palestinian case. The Israelis are imposing an unfair and unjustified siege on Palestinians which is deteriorating the living conditions to a degree that affects all the details of every Palestinian life and in particular the workers, women children and elders. Those latter are day after day, incapable to provide the minimum requirements of life from food, health treatment, suitable home and education. Besides, the lands confiscations, demolition of buildings, establishing settlements and the segregation wall, repeated incursions to the Palestinian territories, assassinations and massacres and violation to the rights of movement. Israel is detaching itself from all its commitments and ignoring the Palestinian legitimate right of freedom and independence.

Moreover, the accelerating of the occupation violence motivated the increasing of the internal violence that exploded through the latest clashes between the Palestinian fragments.

Based on the previous experience, it is indicated that workers were always in the first lines of struggle for both national struggle and social liberation struggle. Nevertheless, such role is highly affected as a result to the general alarming circumstances in Palestine in general and in Gaza Strip in particular. Thus, we believe that there is a must for working on improving the workers' circumstances and releasing the pressure imposed on them.

Dear Friends,

We are addressing you in this letter believing in the universality of the workers issues and their universal right to exercise their rights and perform their role. We are encouraged to write you by your previous progressive positions to support and workers in Palestine in demand for your solidarity in the following:

1. To interfere to help in improving the Palestinian workers circumstances. We ask you here to arrange activities to press on the Israeli occupation to release the siege and embargo imposed on Palestinians.

2. To interfere and so our friends world wide to force the occupation to respect the international conventions and agreements related to the military occupation and allow the workers to access their work sites and consequently protect their resource of income as a vital step in decreasing the tension in the area and respect human rights set.
3. Demanding Israel to reimburse the workers who worked in the occupied territories the sums of money cut from their salaries.

While we are working on preventing the Palestinian people from falling in an internal disaster, we are incessantly fighting to obtain the workers economic and social rights. You have always supported the Palestinian people to obtain it's legitimate rights of freedom and independence.

We believe that it is time for all those interested in human rights on the level of the globe to interfere to force the Israeli illegal occupation to release the collective sanctions imposed on Palestinians.

With our greetings to all of you believing in your role in helping the Palestinian workers to return to their normal life rhythm.
